Corporate Overview

R. Baker Inc. is an SBA certified woman owned General Engineering Contractor. We specialize in the installation, upgrade, repair, and maintenance of underground utilities. Our highly skilled and knowledgeable workforce includes personnel that are Veriforce qualified to backfill and compact trenches containing natural gas pipelines for public utility companies. R. Baker Inc. has successfully completed planned projects and emergency work for private entities; Federal, State and Local governments on the California Central Coast since 1978.

Past Performance

2016 - **Pasadera**

2020 Pasadera is a multiphase residential community approved for 802 homes, a school and a small commercial center. We installed underground utilities (water, sewer, storm drains, dry utilities), well and tank, field drainage and backfilled gas line trenches.
\$11,500,000

Avila Ranch

2020 - Avila Ranch is a 240-acre master plan community.
2021 We installed underground utilities (water, sewer, storm drains, dry utilities) and off-site water.
\$7,300,000

Nipomo Community Service District

2020 We installed a water trunk main for the city of Nipomo, CA.
\$3,000,000

Hearst Castle

2021 Subcontractor to Madonna Construction to support emergency repair/replacement of the 2.25-mile Hearst Castle Road for the State of California. We replaced storm drains while preserving historical landmarks.
\$219,000
